

Indoor Air Quality Project Interest Form

This form collects basic information for a community project about indoor air quality in Philadelphia neighborhoods. The project is studying indoor air quality in homes using small sensors and related household information. It will also determine the impact of running a provided air cleaner in homes. Participants are expected to host air sensors and operate the air purifiers until Fall of 2027.

Completing this form does not necessarily enroll you in the study. A member of the project team will review your information and reach out to you about next steps.
